## **WEEKLY TRADE REVIEW**

Improvement in Business Still Continues.

FOREIGN DEMAND FOR WHEAT

Some Confusion by the Clusing of Cotton Mills Having large Stocks.

NEW YORK, July 20,-R. G. Dun & Co.'s weekly review of trade tomorrow

Dispatches from almost every northern sity of importance reports without exception improvements in business, and from Detroit to Seattle and Portland eplendid crop prospects. The task of adjusting the business and industries of the country to conditions created by n now law has progressed with gratily-ing rapidity and case. Even the increasing strength of striking miners probably forwards the adoption of the rollably forwards the adoption of the nilformity plan, which promises to resurve most of the causes of such strugges. Some confusion is caused by the camingly contradictory dusting of large atton milla when many other works as starting, and by declina in some rices when others are advancing, but he balance is unmistakably on the right ide.

the balance is unmietakably on the right side.

The most important event since the passage of the new tariff, which was generally anticipated a week ago, has been the marked increase in foreign demand and advance in price for wheat. The latter has rised 3½ cented atting the week, with weatern receipts for the first time seventing has purely and wastern railroads besieved for cars and Atlantic exports of 1,718,738 busheles, load in the contract for the week, and 6,351,178 busheles in four nearly and 6,351,178 busheles in contracts for shipment exceeding 1,250,000 inside ion shipment from America to Northern Bohomin and with French markets excited, specialistic sales here have little mer-

with French unwhele excited, speculative sales here have little influence.

The industrial eky is partly overclouded by coal and fron difficulties and hy the closing of some large cotton mills. Havings run for months far shead of the consuming domand on each ton budght at comparatively high pines, the mills ese shoad a large croo and chesp cotton, and it is but the rational way to half production, clear off accumulated stocks at the season when vacations are common, and begin the new year on its own heads.

The woolon manulacturer answers wholescomely to the new tariff conditions, and while opasting of light weights below \$1 in cost has made a very encourseling domand, the advance in prices asked is not large. With very heavy stocks of free wool on hami, menufacturers are able to and in the presence of large stocks of foreign goods, are obliged to engage for the next season without advancing prices in proportion to the rise in wool, and large contracts of that nature have alraady been made. Belling of wool at Boeton, where the speculation has been miss attree citie markets to Hoston, where the speculation has been miss three citie markets to Hoston, where the speculation has been miss three cities markets to Hoston, where the speculation has been most active is suggestive, amounting to \$3.05,000 pounds for the week, and at three cities markets to Hoston, where the speculation has been made. Delay in the iron industry is partly hecanes the wayes have not been settled at all works, though it many, and partly because of the atcadity rising unature work, plates, sheets and hard, the enormous operations of agricultural in planners. Failures fur the week were 238 in the following to the abandance of crops.

ns. nres for the week were 236 in the I States against 281 last year, and Janada against 40 last year.

BRADSTREETS REPORT. . Slow, Conscruative, Steady Ex-

pansion of Trade.

New York, July 3ll.—Hradstreets to-morrow will say: The unexpectedly early fall demand for staple merchan-dies which was announced last week is pronounced, and although not conspict pronounced, and nithough not conspicu-nce at some of the larger eastern cities which is is approaching, is notably no at points in the Mississippi and Missouri valleys and in the larger wheat-growing states. A special investigation this week shows that increased purchases by country merchants in the region speci-fied, hased on the prospectively large wheat crops abroad, has increased busi-ness with western jobbors from 10 to 20 wheat crop at home, in the new of short wheat crop at home, increased business with western jobbers from 10 to 20 per cent compared with fall trade at a like period last year. The total volume of this new husiness la not large, but it is uncausal in this, the dull month of the year, and is increasing. The nurabot of western implement factories are unable of the control of the co western implement incomes are under the fill all their orders for nearby deliv-ery, and one order for suces alone at \$2. Louis calls for \$35,000 worth of goods. The depression among woolen manu-

ery, and one order for access alone at St.
Louis calls for \$35,000 worth of goods.
The depression among woolem manufacturers is less pronounced, because prices of chortols and so, pointing to prove the point in handling high priced wool. The greatest relative improvement among the jobbers and wholesalers in various lines is at Olicaeo, St. Louis attendance than a manufacturers and the provided with the sacretic strains and the provided with the prov

Cause Trouble. rates, and it is the long suffering North-ern lines which will have the demoralization to contend with. It has been accertained that a serious sealy in the rute from Portland to St. Paul is being made by mentpulation of the tickets. This has been made possible by the failure of the conductors to punch the continuous passage feature of the ticket east of the point where no stopover privilexes are allowed. The failure has not only fillowed a scalp rate between Portland and St. Paul, but has served to stock the market at the latter point with the return portion of these tickets, good for transportation until Angust 15th. It is said that the time situation has proved serious enough to threaten the rates between Portland and St. Paul.

After a weary nightof waiting to learn the regult of the meetings of the New York and Cleveland Gas Coal Company's minors, camping strikers were disappointed this morning, for the expected oxodus from Plam Creek and other mines did not cours. All the nines are in operation today. It is not known what the strikers will do next, but it is believed that most of them will camp near the De Armitt mines, and Secretary Warner says they will not leave until the mon quit work, if they remain there a month.

Logal proceedings are to be taken against the marching roal miner and should be a suffective as the marching the income and Shmiff Harrey Lowry will be expected to sen to it that the nearbases are dishanted. While the marches am the miners of the New York and Gleveland Gas Coal Campany have not been a diffective as the numers wish, it is evident that the marches are making an impression on the employees of the company. The shoriff her commanded that all-persons shall refrain from useembling or congregating on the public nighways or thoroughfaces of Allegheny county or interfering with the peans. All are commanded to retire to their respective homes, or places of residence, or to be dealt with according to law. Prosident Patrick Dulan was asked what he thought of the prochamation. He said he did not the prochamation. He said he did not the prochamation, he said the did not the prochamation. TROUBLE EXPECTED.

The Sheriff's Proclamation May Bring It About, Perresence, July 30—At midnight it looks as though the sheriff's proclamalooks as though the shariff's proclamation will be the biggest factor in bringing about trouble in the vicinity of the Du Armitt mines. Tonight a meeting of strikers was held at Oak Hillund it was decided to pay no attention to the sheriff's proclamation. At the meeting it is reported President Bolan, A. P. Carriek and other leadars, told the men that the mandate of the sheriff was unjust and could not be enforced. The result of the meeting was that three meetings were described by the could not be enforced. The result of the meeting was that three meetings were arranged for, one at minlight, one at 2 a.m. and sundher at 1 a.m., and the meeting was that there meeting places. The different times were chosen for the meetings at the best time to each the working miners when changing shifts. FIGEL'S DEFENSE.

BASED ON THE FAMOUS WHITE MAN CASE.

No Evidence Will be Introduced t Refute That of the Proseention.

SAN FRANCISCO, July 39.—Upon the decision in the famous Alonzo J. Whitusu cese will General Bernes base his defense of Theodore Figel so far as the charge of lorgery is concerned. Just before court adjourned today the Goneral announced that he would introduce no evidence to refute that of the procution but would merely argue a few law oints and call the attention of the cour o the case cited. Whitman was sentenced to nine years

to the case citer. Whitman was sentanced to ninayears in San Quentin by Judge Wallace on August 31, 1885, for laving forged the signature of a man named Dixon. Whitman admitted having signed Dixon's name at Dixon's request and the supernous court's roversal was based on the fact that the prosecution had not shown that Whitman did not have authority so to do. Dixon could not be produced but sfilledwis were introduced purporting to show that Dixon was an actual person and that he had admitted having sent Whitman such a check us in was charged with laving forged. On Monday the Figel case will be closed so far as concerns the embezzlement and forgory charges. The houring of the murder charge will follow immediately.

HR. CHADDOCK'S EARNEST PLEA Graded Licenso to Be Imposed o Packers-The Elm Avenue

Approach. The question of a license fee to be in: used on raisin packers came up for ilinal dution at the meeting of the Board of

isors yesterday morning. On the previous afternoon, as described in the Exconnexa, A. L. Hobbs had made an appeal to the board not to had made an uppear to the doct hat to be imposed the contemplated \$30 county license on packers, who, as he coutended, are taxed enough already. Mr. Hobbs had also expressed the opinion that if a tax was to be imposed it should be a graduated one, the small be more than the county of the state of the st

pactors to pay less than the mon who to business on a large scale. do business on a large scale.

The supervisors were anxious to oblige and it was agreed that Mr. Hobbs should present himself the following morning, with the searcace of favorable consideration for his suggestion.

During the night, however, it seemed that Mr. Hobbs underweat a change of larget. When he presented binned was

Durlog the night, however, it seemed that Mr. Hobbs underweat a change of heart. When he presented himself yearented that the Hobbs underweat a change of heart. When he presented himself yearented that the puring in company with Messra. O. G. Bonner and Romaine, the last representing the Griffin & Skelley Company, it was intimated to the board that the puckers would accept the \$50 license as originally proposed, and last is go at that.

Supervisor Smith has a considerable fund of dry humor and had lots of imwith the packers' delegation. He reminded Mr. Hobbs of the graduated scale which that gentleman had so entiminatically alvocated the day before. Just about this time E. G. Chadduck came in and made an independent appeal for the commission nackers. Unior that his preferences and allies had said of done. He first of all defended the commission packers against the popular prejudice which accused them of all kinds of unjust and extortionate things. He claimed that so far from paying a text the commission packers against the receive a bonnty from the consty.

Mr. Chaddock insisted that it was

ers ought to receive a bonnty from the constly.

Mr. Mr. Maddack insisted that it was only through the self-sarrificing efforts of the commission packers that so much work is found for the laboring men and women of Fresno. The impusition of a sicense might have the effect of closing up the packing houses here and of opening them up in the East where laker is cheaper.

Just at this point Mr. Smith dryly reminded the speaker that the other representatives of commission mackers middle the speaker that the other representatives of commission mackers (Chaddeck, realizing the situation, closed bis discourse.

The board finally adopted the graduated scale as follows: Packers of less than 50 carleads a resecut to pay a \$10 license; from 50 to 100 carleads, \$20 cover 150 serious, \$30. There are to be twelve tone to the carleads.

over 150 carlonds, \$30. There are to be twelve tons to the carload. Mr. Chaddock, who was at one time pastor of the Congregational church of this city, created some ammement at one period of his speech. He came as possible for an ex-minister of the gaspoel. In institug the commission packers are much miligaed individuals he sail the papular idea is that they are not worth a tinker's imprecation. "Hammer" was the word Mr. Chaddock used, adding saily that the commission packer is a benefactor of the luman race.

The board instructed the district attorney to proceed to collect the unpuid licenses of cartain saloon and restaurant kenpers in the county.

The Elm avenue approach came up for considuration. Until recordly a good open roal ran diagonally from the concern of Mono and Fatreau to the corner of Elm avenue. tween G street and the ditch at Etm avenue.

Supervisor Smith is anxious for the county to sequire possession of the helf block Xo. 26, in the rear of the salmon at the corner of Eim avenue, where it crosses the ditch. The possession of this half block would be valuable to herders of cattle and sheep, and would also give a good centrance to the city. The County Covernment Act Vir tually Repealed the Clark Law.

From the San Promises Call.

The supreme court has punched another hole in one of the laws enacted by the late legislature. The Clark could law was introduced by Assemblyman Clar of Alamada, and provided for the election of boards of trustees to take charge of all road matters, the law to go into effect sixty days after approval. This time fell on May 31st of this year. It also provided that the election of trus also provided that the election of trus-tess should take place on the last Satur-day of May. any mumbers of the department had discubed orders.

The inquiry was divorted in the direction of George Machen, the absent driver of engine No. 1.

Mr. Machen is at Yosemite, having been granted leave of absence not exceeding fifteen days. He has been absent an days.

In reply to a question Gity Attorney Smith said such leave of absence is sanctured by the ordinance. Mr. Spinney said that the board needed its paid fromen during the summer season, and kept them in the winter when there was nothing for them to do. He moved that Driver Machen be discharged and that the fire department be instructed to select another ma.

The game of basebull calls into use and training every nussels of the body. The ope must be clear, the foot swift, the hand sure, the muscles supple and tongh. The ideal player is temporate, cool, courteous, quick of thought and action. To play ball is a liberal physical education. The Greeks, that worderful people, to the excellence of whose wisdom the scantuities have added nothing, axalted not so much the runner, who present toward the mark of the prize, nor the boxer, whose skill with the ceston estanced his antagonist to the ground, hat rather the pentathlete—ha who being acidner the swittest runner nor the swonest wreather nor the strongest wreather nor the too the strongest wreather nor the too as one was more symmetrically formed, najnyed more rabust health and had in finished perfection the sound body which the sancients exteemed as admirable as the sound mind. It is just this excellence of the pentathlete which the game of basehald evelops.

Within those twenty years boxers, coarsons, antitiors, wrestlers—champions of all sorts have appeared, been applanded and passed from sight. But Grandfather Anson still holds down into bag the legs of baseman. The spectation who beheld him in youth have the legs of baseman the segment from the cremambient air, still nimbly caporation bag to be, still nimbly sides between the legs of baseman the spectation who beheld him in youth have grown gray with years; umpleas have reem and passed away and still millerings in immutal youth, the pride of Chicago, the envy of St. Louis and the terror of the Giants of Gottaun.

District Apart "H. Werrington of

District Agent T. H. Warrington of the Valley road was interviewed last evening by a Reconstant reporter, to whom he stated that he had little to add to what appeared in the Call. The ates mentioned in the article quoted have been in force about a mouth and the compating had less already shipped considerable dried truit to the points amoned, where there is quite a market. It is prapared to take all shipments that may be offered to these or intermediate points.

the interest of a "union of all of the reform forces to give an emphatic and prononnead majority vots for true reform candidates for President and vice president," in 1900. Among other foolish statements, it says: "Of the two, the ultra goldbug and avowed enemy of the cases of the people, and the sham Populists, of the middle-of-therroad persuasion, the latter is the most dangerous to the cases of the people."

This sentiment seems to be quite common in the so-casiled Populish press which are so desirous of "uniting all the reform forces," and at the same time are denomined true Populists for causing discord. Nine-tentils or the slaword and abuse that is to be found in the "reform forcey" cames from these fusion organs, who if they belong any where belong in the ranks of the Pauloratic party—in arry that has not redected at the people for the yeak querier of a cantary. This uncalled for abuse and billingerate, indulged in by the few facion organs who are masquarading as Populist papers, will hardly tend to line the rank and file of the party up with the place-scakers and pischnaters in both the Democratic and People's parties, who are so anxious for a "union of referre forces in the interest of the papers." The one thing most littly to prevent cuch union is the fact that this class of pothnass politicians seem to be in centred of the Democratic party; county, state and union, and are trying to secure coulted of the People's Party. They may have conired of the party machinery, but if such is the case, they will find the rank and file of the party in the saddle in the next campaign.

In answer to a question Mr. Warrington stated that he bolieved the Valley road would soon be able to make rates forther East. The company is making every effort he give the puople transcontinental competition, and where there's a will there as warring the construction of the Valley road could be proved the property of the total proved the property of the voice of the Valley road could, it was learned yesterday that the track-laying force on the Visalia branch had seached a point at the valley road could be the provided a point at the rate of a shout of the valley road could be the provided as point at the rate of a shout two miles at day. The St. John's river will be reached on Taustlay evening, and then a delay of about to make the price and frame work are all in place, as all that remains to be put in are the spans. After that it will not take more than two days to outer Visalia, which, at course, will observe it was a will be experienced to the will deliberate in grand style. These changes will go into effect as soon as the sedecimber are prepared, which will be in low days.

Itelerring to the statement in the Southern Pacific had no dried fruit rates into Fargo and Grand Forks, Mr. Booth stand that his company's transcontinental rates—\$1.00 a hundred for fruit in borse and \$1.20 in sacks—applied to those points. Agent hundred for fruit in boxes and \$1,20 in seakes—uplied to those points. Agent Warrington of the Valley road, who was seen later, expressed the opinion that Mr. Booth was ministen. The southern Pacific, he said, could give rates only to Ortonwills. From there to Parpo and Grand Forks it must pay the local, which is 22 centra hundred on boxed goods and something more that on truit in sarks. Thus the rates would be in excess of those charged by the Valley road. There is no doubt, however, that the Valley road's rates will be met.

A Mistake Made in the Past by Ex pecting the Farmer Alone to Pay for Them.

Dixon, Ill., July 30 .- At the Rock iver Chantons this afternoon Otto Dorner of Milwaukee, chairman of the imper of intraduces, chain and the National League of American Wheelmen, deliv-ered an interesting address on "How Shall We Obtain Better Roads?"

Mr. Dorner said in part: "The great question before us is how shall we ob-tain better country highways. The question is not do we need good roade, but how shall we got them. Read building in the United States has been left ntirely in the hands of the farmers and

not how shall we get them. Read building in the United States has been left entirely in the hands of the farmers and in charge of the local town suthorities. Phese lucia anthorities as a rule have no knowledge of the science of road building, and fifty wears of experience has shown a great deal of labor wastal and vast amounts of real targe collected in wastal in many places today our roads are no better than they were twenty and thirty vears ago. A radical improvement in the system itself until he made.

The League of American Wheelmen has been this subject of much criticism on account of its agitation for better highways. We have been accused of estimates in the mater. It is believed by many that we wheelmen expect farmers to load themselves up with taxes that they might build roads for the convenience of bicyde ridors. No greater mistake could be made. We of the League of American Wheelmen who are ongaged in this agitation for better roads feel that today the farmer bears his foll share of public texation wheelmen who are ongaged in the sagitation for better roads feel that today the farmer bears his foll share of public texation and that it should not be unnecessarily added to. We feel that a mistake has been made in the past, in aspecting farmers alone to pay for building roads, and in leaving the entire responsibility for our roads in their hands. The furners alone to pay for building roads, and in leaving the entire responsibility for our roads in their hands. The furners the old work every farmer is obliged to bailty by the construction of good roads. It is claimed that in the state of New York every farmer is obliged to bailty roads for eight oversone out of the state population. Why should not the other seven country highways. Country merchants, declors and professional merchands, declors

that the farmers should pay for building these roads.

I am gian of an opportunity to say to anthering of farmers that the L.A.W. proposes to help them in bringing about a proper division of the cost of good roads, so that city people, the capitalists, merchants and manufactorers, the weatthy corporations, railroads, insurance and telephone companies, in fact, every class of people chall contribute to the building of them it that a part of the cost of good roads should be paid out of the capitalists, and the cost of good roads should be paid out of the building of them it that a part of the cost of good roads should be paid out of the state tax, according to the amount of property a tax payer owns. We propose that the states shell holp to build and divide the total cost between the people of the locatity who are most directly interested. This is not a theory only, but has been admitted in practice with great success in New Jersey, Connection, Bande Lessette.

and Massachusetts.

New Jorcey farmers are enthusiastic over this state aid system, and the towns and counties are glad to pay their whare of the cost of these roads so long as the state pays its part.

The farmers' national congress has passed resolutions in favor of state aids and John F. Stabl, the cerestary of that organization, is one of its warmest adversals.

organization, is one of a management vocates.

All classes are beginning to realize the great economic importance of permanent highways. The farmers feel that they here too long been compelled to build and improve roads at thoir own expense and that they are entitled to public emport in this great necessary public improvement. Upon these lines, and upon these lines alone, the good roads movement is bound to succeed.

What Samuel J. Tilden wrote into the Democratic platform of 1876 was expunged in 1894 by a job blot of paternalists of half is dozen different colors—Tillman, Newada Jones, Stewart, Peller, Barney Gibbs, Madam Lease, the unspeatable Sukar and that tayout, who wrote startiff plank that Pig from keep himself could have stood on. It is due to Sanator White, however, to say that the faught monfully springer that he as Sanator White however, to say that the faught monfully spring the paragraph relating to borax—he said he would vote for the protection soiley because it was for the Interest of some of his constituents and not because it was right.

California came into the maion in 1850, while the thirry-first congress was in existence. The compromites of that year was the less great service Henry Chryrendired his country, the treaty the work of Douglas, and admitted by Chry hieself, John O. Fremont, a free-onl Democrat, and William M. Gwinn, a prosilvery Democrat, when first construct President was the Bryon of his day maintenance of the world have been encosently eccaped at, the search of the world have been encosently eccaped at, the search of the world have been encosently the world have been encosently the search of the sear California came into the union in 1850 and a diselier. His quarrel with David
A. Terry resultati a meeting on the
field of hunor, and Brotherick fell. Tostory of David Terry has never been
told. When it is public opinion will relent. Up to the tune that Terry was
caught in the toils of that Mosbitees,
who hastened him to his end, he might
have stood up before all the world. A
reliable history of California politics
and politicians, a plain tale, such as Defor could have written, would be the
most entertaining volume ever produced on this hemisphere.
Milton S. Lathem was another California senator. He was here that stormy
cassion when the coutors re-

formin senator. He was hore that stormy assion when the southern senators retired. His speech on the Orittenden compromises was a powerful argument, and ulosed with a burst of eloquence celome equalsh. I memorized that percenting when a hoy, and it haunts me to this day, more than a third of a century later. The speech was circulated extensively in Kentucky, slong with Jon Holl's matchiese letter to the poople of that state, and to it was due much of the Union somtiment. I believe Latinan is yet living; very old and very rich.

Latinan is yet living; very old and very irth.

Lames A, Mchangel wes a Callfornia constor for the term ending in 1899. He was a brilliant resinus, an orator, a citibin and a poot. His appetite for run ritined lini and made a wreck of the mat splendt intellect the Pacific slepe has known. John Conness and Carcellus Cole, Engene Dasserty and A. A. Sargent were sentors from California during the days of reconstruction. They were all able men. Nawton Booth came in about 1875. He was the pioneer magatum of the Union and a very able man. His lecture on Charles James Fox was a delightful essay. John T. Farley and John F. Miller came in lator, and they gave place to Goorge Hearst and Leland Stanford, bath conormanyly weelthy. Charles Felton, another rich man, was in the senatu a white.

White is the most wordy man in the senste, after Wolcott, and he is a faster talker than Wolcott. He could repeat the whole book of Ruth while Stewart was reciting the Lord's Frayer. Foungs an able man and a fine debater, his flow of words makes him appear flippant. An untiring worker, he is always prepared, and he is a very ucly customer to serious. It is a nity that his Democracy An untring worker, be is always prepared, and he is a very ugly customer to
sir up. It is a pity that his Damocracy
is not of that tough fiber of which Donaldeon Caffery is made. There is the
old warhorse for you. Perkins is a dapper little man just out of the bandbox.
He looks and talke like a Freehyterian
minister, though much of his life was
spent hefore the mast on a sailing vessell. He landed in California in 1835,
when ill years old, a sailor hoy. He uscame a murchant, miner, banker, unlike
and operator of steamship lines. When
he got rich he got into politics, as all
poul Californians do. Now he is a
United States seemen. Sometimes his
manner and language is a little affected.
Thus when he wanta to say Cobane he

H. E. Huntington in Los Angeles.

SAN FRANCISCO, July 30. — Jabez H. E. Huntington in Los Angeles
Howes, who at one time was the head of Los Angeles, July 30.— H. E. Hunt Ington, general manager of the Southern Paelfie Company, arrived, in the city today in his private car, in which he remained the greater parties of the rad, when questioned as to the object of his visite this city. Mr. Huntington replied that his trip was of ne special significance. He will remain in Los Augeles and vicinity several days, devoting his time to a close inspection of the road and to conference with the heads of the various departments.

But way back in the days before the league system was perfected i used to see some curious things. I remained to me the in central Ohlo that was as good a lecal organization as I ever saw. All the men in the team were strapping six footers, used litekery bais and knecked a live balt so far that all the farmer bays in the victimity had a supply. Finally a sporty manager gethold of them, went wherever there was a game to be had, took a professional battery with him and bethall the money line round place. the opposing manager feel so good that practice my bors got langicet up in their war feet, fell over cach other and made the opposing mininger feel so good that he was betting at every term. I was right with him as long as I had a dollar, and there was a big roll for one of us when the game was over. Now there was a change. My boys came not of the dressing room in lanickerbockers, sweaters and canvas shoes, as slick a luoking lot of ringers as your ever saw. It was a cinch, and I was only hot because I had no more money to pat up."
"You made a good thing of it?"
"Good thing? I got the double cross. My battery sold on to the other manager. They beat us so bad that the scorers deminated extra pay. My pitcher and catcher got away before I could borrow a gue. I walked ten miles to the nearest station and then took a box car. That wasn't a square game."—Detroit Free Press.

The People Neurest the Pe

The People Nearest the Pole.

The Righs, a bandful of Eskinnos numbering probably 100 persons, are the most northern people of the world. They have their abiding place on the west caust of Greenland, latwarn 70 and 79 degrees north latitude. For many years after Dr. Riano came home with his vivid and absorbing story of these isolated natives they were gappased to have built their stone lints nearer the pole than any other human hedge. It is known may, however, (banks to Bassels, Nares and Greely, that there are numerous traces of human occupancy as far north as the ciptly-second parallel, and so long ago was it that they built their hats and sledges and lamited the bear and warus in the fur nurth of Grant Land that the in the far north of Grant Land that th Etah natives of today have only th dimmest and most uncertain traditions of them.—Pittsburg Dispatch.

The Danes, or Northmen, first became preminent in European history in 783, when they began to ravage the north coast of France and southern shores of Great Britain. The daving of these bards cancer was remarkable for in Grant Britain. In daring of calco-hardy sensues was remarkable, for in their small ships they even penetrated the Mediterineous and became terrors to the senhuard population of Italy, Sicily and Greece. The first king of Demork is said to have been Skield, 50 B. O.

The rarest and costlict genes, though not always estermed the most beautiful, are pigeon's blood rubies, fire opals and diamonds that are pure but shed a distinct glow of blue or plak. A very perfect pearl of generous size and lustrous skin, tinted a rarely beautiful golden green, was valued, ausset, at \$1,750.

Farmers and Mechanics. This is a quiet kind of game. There is a trade to be discovered, and everything is indicated by signs. Thus when the one who left the room re-enters, if trade chosen is that of a farmer

the one who left the room recenters, the trade chasen is that of a farmer, one will be reaping in a fine exop of nothing with pape's stick, with another, perhaps, gleaning after him. One, taking hold of the legs of a thining room chair, will form it into a serviceable play. In one corner a boy will be engaged in threshing with his sister's perseal, and in another the sister will be busily engaged in smaking latter in an invisible court.

If they are nucleanies, they may mend their shoes in concert or saw mend their shoes in concert or saw at the chairs with a stick, hammer mails into the planoforte, plane the resewood table, or do saything else, so that they all agree to acting one employment which may form a good indication of their trade. When he who was out guesses it, another takes his place, and another trade is chosen.—Exchange
